Executive Summary

BE Computer Science student with a strong interest in problem solving, designing user-centric interfaces and web development. Passionate to continuously learn, adapt, and explore emerging technologies to develop efficient, scalable, and impactful software solutions.

Technical Skills

Programming Languages: Java, SQL

Technologies: HTML, CSS, JavaScript, React, Next.js, Express.js

Development Tools: Git, GitHub, Figma, UiPath, Claude code

Work Experience

Zingbizz Digital Solution, Full Stack Developer Intern Mar 2026 – May 2026

- Built the RAG Based Customer Support Chatbot Platform SaaS product, implementing Retrieval Augmented Generation pipelines and semantic search for accurate, context-aware responses.

Multimeta.AI Tech & Consulting, Full Stack Developer Intern June 2026 – Present

- Building a Women SOS safety application featuring live location tracking (Track Me), ride tracking (Track My Ride), and an SOS module that triggers an emergency call to the police on a triple press of the power button.

Projects

Emotion Aware Speech Therapy Platform

- Built an Emotion Aware Speech Therapy Platform that combines AI driven speech analysis with adaptive therapy workflows for patients and therapists. Developed real time speech transcription, phoneme analysis, fluency scoring, and emotion detection pipelines, enabling personalized and adaptive therapy instead of static exercises
- Developed a rule based adaptive therapy engine that analyzed speech rate, pauses, hesitation patterns, fluency, and emotional cues to dynamically adjust therapy difficulty, pacing, and feedback in real time.
- Built an interactive recording and analytics system capable of detecting emotions from speech inputs, enabling therapists to monitor emotional engagement and improve therapy effectiveness.
- **Tech Stack:** FastAPI, Next.js, PostgreSQL, Whisper ASR, SpeechBrain, Wav2Vec2, HuBERT, spaCy, Redis

RAG Based Customer Support Chatbot Platform

- Built an RAG based customer support chatbot platform that allows businesses to create custom chatbots trained on website content and documents. Implemented Retrieval Augmented Generation (RAG) pipelines and semantic search for accurate responses.
- Developed a full stack SaaS dashboard with support for website scraping, PDF and document ingestion, training status tracking, and embeddable chatbot widgets for seamless website integration.
- Implemented chatbot insights and monitoring features and also built customizable chatbot personalities, branding, and live previews to improve user engagement and business support automation.
- **Tech Stack:** Next.js, PostgreSQL, OpenAI API, RAG, Tailwind CSS.

Smart Academic ERP & Analytics Dashboard

- Architected a cloud-native academic intelligence system integrating Azure OpenAI to facilitate natural language querying of student data.
- Engineered a high-performance data ingestion engine capable of parsing and validating bulk CSV attendance uploads with deduplication logic ensuring data integrity across thousands of records.
- Integrated a PostgreSQL MCP server with the chatbot, enabling teachers and admins to query student data and performance analytics directly using natural language.
- **Tech Stack:** Next.js, TypeScript, Azure OpenAI, Azure Blob Storage, PostgreSQL, MCP

Education

Bachelor of Engineering in Computer Science

2022 – 2026

Rajalakshmi Engineering College, Chennai

Current CGPA: 7.45

Certifications & Achievements

- **Introduction to Model Context Protocol** - Anthropic
- **UiPath Automation** - Automation Developer Associate Certificate
- **Next.js Full Stack Bootcamp** - JavaScript Mastery (Completed with project)
